

MIDDLE SCHOOL NEWS

Here's a new school year with lots more of exciting activities and programs. As we begin the new school year we have new teachers who have joined our SJMIS family. To make this school year even more exciting and fun, we have after school activities like sports and other clubs. By this, we get an opportunity to play around with our friends for a longer time. We also have more time to attain training in the field of the specific sport. Another new improvement that the school has implemented on is the half day activity. Each year the school takes many suggestions into consideration and mends the way things are done.

How many times have you wished for something and it came true, not many times. This time, in our 6th foundation day program, the school gave an opportunity to the high school and middle school girls to participate in the beauty pageant. We celebrated our school's 6th birthday with a grand raffle draw which had loads of exciting prizes for everyone. The DVD player was won by Dolly and the grand prize which was the iPad, was won by Lydia. (Both of them won a prize only because of me!) We even had our motorcade in which the middle school and high school students, teachers, and parents went around on float advertising about the school. The 6th foundation day of SJMIS was a memorable day for all!

So, this school year will be loads of fun with camps and fieldtrips. Our new programs will surely make this year at school really exciting. We will be looking forward to many more exciting activities throughout the year. The school should take in more suggestions in consideration every year so that each year the school will be a better place for the students to be at and they would even enjoy the different curriculums.
