

# MY HOBBIES & INTERESTS

Hi, I'm Sanya and I'm going to tell you my hobbies and interests. I have many interests and hobbies. I like to do recreation activities, collect coins, notes (money) and stamps, watch television and read books.

Doing recreation can also be your hobby. As I just love to play games and do different types of activities. I also like to do different types of obstacle activities. I have very fun while doing various types of activities.

Collecting coins, notes (money) and stamps of different countries are also my hobby. Till now, I have coins and notes (money) from Singapore, Malaysia, Paris, Germany, Australia, New Zealand, and of course Thailand.

Reading is also one of favorite hobbies. I like to read mystery books like secret seven and famous five. I also like to read comics and magazines. I read magazines like for example, Children Digest and Tell Me Why. Children Digest is like Reader Digest but it is for children. Tell Me Why is like an encyclopedia and every issue tells thoroughly about the topic.

Watching TV plays an important role in our daily lives. In fact it is one of my favorite hobbies. Almost everybody watches TV some time every day making it perhaps the most common hobby in modern society. It brings us a lot of benefits. Watching TV can increase our knowledge of the world, give us information to improve our lives and provide a lot of fun. I like to watch cartoons but I also like to see shows that give me knowledge like for example, general knowledge quiz competition.
