

## My Interest

When I grow up I want to become a Pancreatic Surgeon. This thought came into my mind because of my father. My father is a pancreatic patient so I got a great thought in my mind of becoming a surgeon. I always thought that I will become something which will help my family and this is the right one. I pray to god that my dream comes true. I will do my best to achieve it. It's my interest and I will change it to my work.
