

Hello, nice to meet you.

This is Hyunhui Park (Andy) from St. John Mary International School.

I am 14 years old.

I am a Korean boy that interests in music and math.

I have a problem in choosing my career later on my future because I love both music and math.

Sometimes I feel I want to be a cellist but I also want to be a mathematician.

Maybe I have to start thinking about my future now.

My favorite color is green because when you hear the word 'green', you might think the nature.

That's why I like green color.

And I live in Pusan, Korea which is near to the sea, so I can go to the sea anytime if I want to.

I love the moment that I spend with my friends in Korea and Thailand.

I love them so much.

As you see the pictures below this, that is my friends and me.
