

What is School?

School. What is school? Some say it is the best place in the world, while some say it's the worst. Some say it's heaven, while some say it's hell. There you can find the future Obamas; on the other hand you can find the future Osamas. Well, I believe school is heaven. What can be a better place than a place where you receive knowledge! School is like your family. Your teachers are like your parents, protecting you from harm, and your classmates are like your siblings, supporting you and encouraging you. School is the place where you grow and develop, where you mature, you build your basic attitude, get opportunities to bring out your talent, and understand the world outside. School is a place where you also get to learn new talents like art, music, etc. School is a place where you have fun, yet you make your life's most serious decisions. You should NEVER waste your school life because school life will never come again!
